I am a recent technology graduate and project management professional with experience in the pharmaceutical industry. I completed a Software Engineering bootcamp at General Assembly which has equipped me with the technical skills and knowledge to pursue a career in the tech industry.

As someone who is passionate about technology and its potential to solve complex problems, I am now seeking an opportunity to apply my project management skills and technical knowledge to a dynamic and innovative team. My strong communication skills and ability to manage multiple projects simultaneously make me a valuable asset to any organization.

## SKILLS & PROGRAMMING LANGUAGES

---

- MERN (MongoDB, Express JS, React, NodeJS)
- JavaScript, CSS, HTML5, SQL

## SOFTWARE PROJECTS

---

### Portfolio

- Designed and developed a portfolio website using React and SASS to showcase projects.
- Developed a Projects section that displays project information, including project title, description, technologies used, and links to the project's GitHub repository and live website.
- Created a navigation bar using React Router that allows users to easily navigate to different sections of the website.
- Incorporated animations and visual effects using React libraries to improve the user experience.

### **BookApp**

- Developed a web-based book tracking application using Node.js, Express, and MongoDB as the database.
- Implemented RESTful APIs for data storage and retrieval using MongoDB.
- Implemented user authentication and authorization.

### **Dan's List**

- Developed a simple ecommerce application using Node.js, Express, React, and MongoDB as the database.
- Implemented add to cart functionality that allows users to add products to their cart and checkout.
- Developed the front-end using React and implemented responsive design using CSS and Bootstrap to improve the user experience.
- Implemented RESTful APIs to handle requests from the client side.
